GETTING STARTED

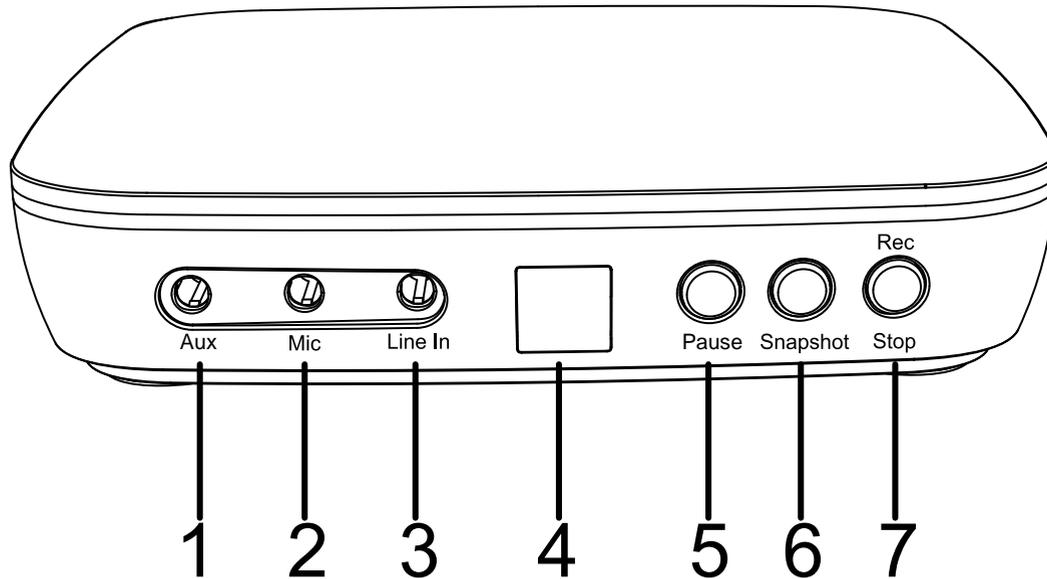

1.1 Box Contents

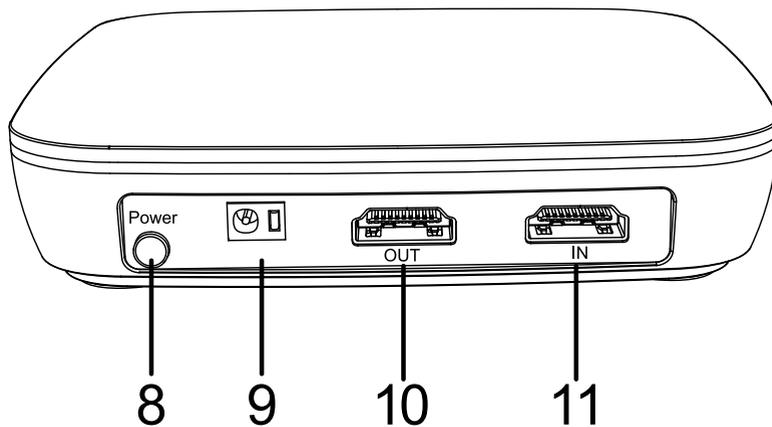

- a. Power Adapter
- b. Remote Control
- c. 4K BOX

- d. User Manual
 - e. Typec cable
 - f. HDMI cable
-

1.2 Product Diagram

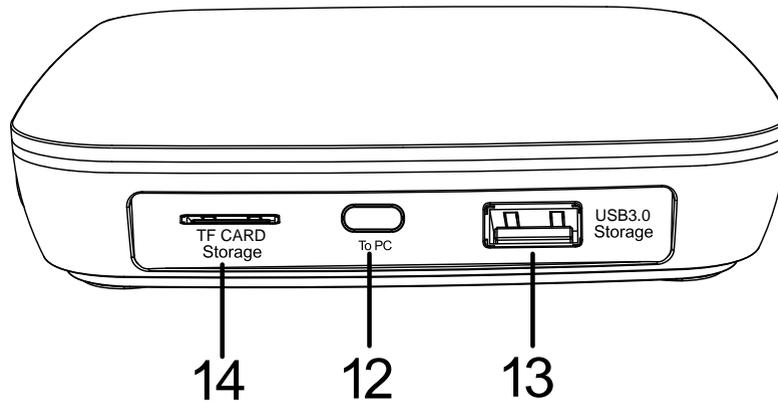

1. AUX:TRRS
2. Mic: Insert the microphone plug into this jack to input voice.
3. Line In: Stereo audio inputs.
4. IR Window: Receives the IR signal from the remote control.
5. Pause: Can be paused during recording.
6. Snapshot button.
7. Rec/Stop button.

- 8. Power ON/OFF button.
- 9. Power socket of 12V/1A.
- 10. OUT:4K60Hz Connect HDMI and bypass to TV
- 11. IN: 4K60Hz Connect HDMI

1.2. Product Diagram

12. TO PC Connect the TYPEC to USB cable between PC and UHD for recording video to PC

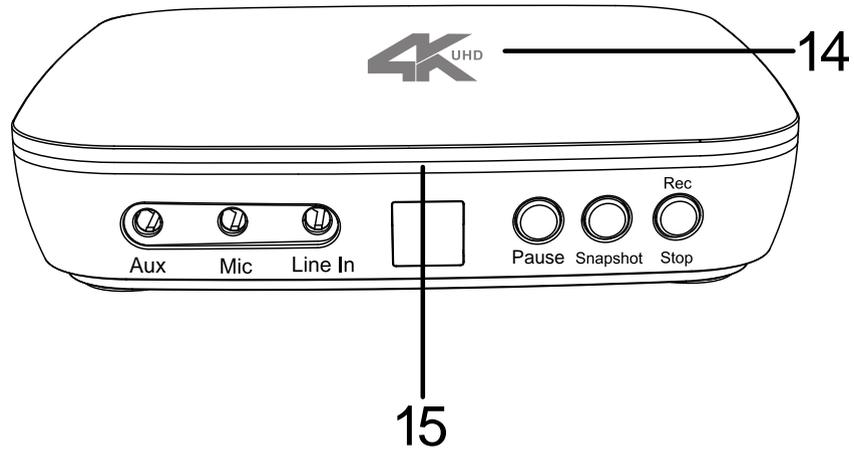

Tip: This function above must be realized with software. Please use OBS etc

13. Storage: Insert a USB flash drive or mobile hard disk and record videos to this storage medium.

14. Storage: Insert a TF record videos to this storage medium.

3. Audio Settings

Audio Settings

The image shows a dark-themed audio settings menu. At the top, the title "Audio Settings" is centered. Below it, five volume sliders are listed, each with a blue bar and a white slider knob. The sliders are arranged vertically. The first slider, "HDMI In Volume", is highlighted with a blue background. The other sliders are "Line In Volume", "Mic In Volume", "Line Out Volume", and "HDMI Out Volume". Each slider has a left-pointing arrow on the left and a right-pointing arrow on the right. The current volume values are displayed on the right side of each slider: 60 for HDMI In, Line In, and Mic In; 60 for Line Out; and 80 for HDMI Out.

Setting	Volume
HDMI In Volume	60
Line In Volume	60
Mic In Volume	60
Line Out Volume	60
HDMI Out Volume	80

Why does the recorded file split into multiple segments?

Using exFAT/NTFS USB storage devices, the single recorded file will be 16.7GB at most. Using FAT32 USB storage devices, the single recorded file will be 4GB at most due to the limitation of FAT32 format.

Or one file will be unlimited (support Exfat, Gpt, Mbr format)

Does UHD Pro work with an over-2TB external hard drive?

Yes, UHD Pro works with an over -2TB/4TB/6TB/8TB external hard drive.

For UHD Pro, it works with all formats of USB sticks (NTFS, FAT32, exFat) and external hard drives (MBR and GPT). FYI. Due to the maximum capacity limitation of FAT32 and NTFS format, if you use an over-2TB external hard drive and don't want to partition it, please format it to exFAT, it will work. If you want to use NTFS/FAT32, please partition it first, it will work.

Note: The single file length is also limited to 3 hours. If the size of the video file has not reached 4GB/16GB but the length exceeds three hours, it will also generate a new video file.
